SUMMARY

Dedicated Computer Science student specializing in Flutter mobile application development with strong expertise in Firebase integration, state management, and cross-platform solutions. Experienced in implementing modern architectural patterns including MVVM and skilled in creating intuitive user interfaces. Committed to delivering high-quality mobile applications through collaborative development and continuous learning.

EDUCATION

COMSATS University Islamabad
BS Computer Science - CGPA - 3.36

09 2022 – 07 2026
6th Sem, Sahiwal Campus

TECHNICAL SKILLS

Languages: Dart, Java, Python, SQL, C++

Mobile Development: Flutter, FlutterFlow, Cross-platform App Development (iOS & Android), Material Design, Cupertino Design

Technologies & Frameworks: Firebase (Authentication, Firestore, Storage), Provider (State Management), MVVM Architecture, REST APIs

Developer Tools: Android Studio, VS Code, Git, GitHub, Figma, Firebase Console

Soft Skills: Problem-solving, UI/UX Design Principles, Team Collaboration, Debugging

PROJECTS

StudySphere [↗](#) | [Flutter](#), [Firebase](#), [Provider](#), [Dart](#) **2025**

- Built a centralized academic resource app for university students to access past papers, join study groups, and get academic guidance with real-time peer support.
- Implemented Firebase authentication and Firestore database for secure user management and real-time data synchronization across study groups.

ChronoMart [↗](#) | [Flutter](#), [Firebase](#), [Provider](#), [Dart](#) **2025**

- Developed a multi-vendor e-commerce app for watches where users can browse, filter, and purchase based on brand, style, and price.
- Integrated seamless cart management system with Firebase backend for inventory tracking and order processing.

MealMate [↗](#) | [Flutter](#), [Firebase](#), [REST APIs](#), [AI Integration](#) **2025**

- Created a universal food discovery app allowing users to compare menus, prices, and find nearby restaurants with location-based services.
- Implemented AI-powered meal recommendations and social content modules for enhanced user engagement and personalized experience.

TastyBites - Food Delivery App [↗](#) | [Flutter](#), [Firebase](#), [MVVM](#), [Provider](#) **2024**

- Developed a comprehensive food delivery solution with Firebase backend integration, featuring real-time order tracking and user authentication.
- Implemented MVVM architecture with Provider state management for clean, maintainable code and responsive Material 3 UI design.

COURSEWORK

- Mobile App Development
- Data Structures & Algorithms
- Object-Oriented Programming
- Database Management Systems
- Software Engineering
- Human-Computer Interaction

CERTIFICATIONS

Mobile Game App Development Certification [↗](#) **2023**
PNY Trainings *Certified*

- Completed comprehensive mobile game development training utilizing C# and Unity engine, establishing foundational knowledge in cross-platform application development.
- Acquired practical experience in physics systems implementation and mobile application frameworks, directly applicable to Flutter development methodologies.
